

**MiFID II Product Governance / Retail investors, professional investors and eligible counterparties target market** – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Securities, taking into account the five categories referred to in item 18 of the Guidelines published by ESMA has led to the conclusion that: (i) the target market for the Securities is eligible counterparties, professional clients and retail clients, each as defined in MiFID II; and (ii) all channels for distribution to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Securities to retail clients are appropriate - investment advice and portfolio management, and pure execution services, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

Any person subsequently offering, selling or recommending the Securities (a distributor) should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

#### **Restrictions on the free transferability of the Securities**

Subject to certain restrictions relating to the offer, sale and delivery of Securities and to the distribution of offer documents in the United States, the European Economic Area, the United Kingdom, Austria, Germany, Spain, France, Italy, Belgium, the Czech Republic, the Netherlands, Poland, Ireland, Switzerland, Hong Kong, Japan, Singapore and Taiwan, there is no restriction on free transferability.

#### **Where will the Securities be traded?**

#### **Admission to trading**

The Securities are not admitted to trading.

#### **What are the key risks that are specific to the Securities?**

#### **Most material risk factors specific to the Securities**

There are risk factors which are material for the purpose of assessing the risks related to the Securities, including the following:

- **Risks as the creditor of the Issuer**
  - Risks relating to the holding of securities in the event of a resolution procedure initiated at the level of the Crédit Agricole Group or any entity of the Crédit Agricole Group : if such a resolution procedure were to be implemented, the exercise of the powers provided for by the competent authority could result in (1) a partial or total depreciation of the Securities issued; (2) a partial or total conversion of the Securities into shares of the relevant Issuer resulting in an undesired holding of shares and a possible financial loss on the resale of such shares; (3) a modification of the contractual terms of the

Securities which may modify, in particular, the financial and temporal elements of the Securities which may result, in particular, in coupon reductions or extension of maturity and adversely affect the value of such Securities.

- Return on the Securities may be limited or delayed by the insolvency of the Issuer: the commencement of insolvency proceedings against the Issuer would have a material adverse effect on the market value of Securities issued. Any decisions taken by the Assembly or a class of creditor, as the case may be, could substantially impact the Holders and even cause them to lose all or part of their investment, should they not be able to recover amounts due to them from the Issuer.
- Absence of gross-up provisions under the Securities: the Issuer shall not be obliged to make any increased payment to compensate for any such withholding or deduction relating to the Securities. As a result, Holders could lose part of their investment in the Securities.

- **Risks relating to the structure of a particular issue of Securities**

- The Securities are subject to automatic redemption upon the occurrence of an Automatic Early Redemption Event for their Automatic Early Redemption Amount. This may have an adverse effect on the value of the Securities and may lead to redemption at an amount or time less favourable for Holders, who may thus not receive the total amount of the capital invested
- There are no events of default under the Certificates
- Collective organisation of Holders: each Certificate constitutes a separate claim and does not form a Series. Holders of the Certificates are not grouped into a masse or collective body with a view to protecting their interests. As a consequence, their interests may not be well represented and protected, which could have an adverse effect on the market value of the Certificates and could result in the Holders of Certificates losing part of their investment in the Certificates.
- Risks relating to the relevant underlying of the Securities
  - Certain Factors affecting the value and the trading price of the Securities (price or value of the Underlying Reference, volatility of the Underlying Reference, remaining time, ..) .As a result of all of these factors, any Holder who sells the Securities prior to the stated Maturity Date may receive an amount in the secondary market which may therefore be significantly less than the intrinsic market value of the Securities and which may also be less than the amount that the Noteholder would have received if the Holder had retained the Securities until the Maturity Date.
  - Risk of capital loss for Securities for which the indexation of the payment and/or redemption amount is determined based on a calculation formula and indexed to the Underlying Reference. In the event of an unfavourable change in the price, value or level of the Underlying Reference, or in the event of the occurrence of an unfavourable change in the price, value or level of the Underlying Reference, or in the occurrence of or the absence of occurrence of an event affecting the Underlying Reference, the Holders may suffer a significantly decreased rate of return on the Securities or even no return whatsoever, could see the amounts of interest and repayment significantly negatively impacted and lose all or part of the capital initially invested.
  - Risks relating to Share Linked Securities:
    - An investment in Share Linked Securities may bear similar market risks to a direct equity investment. Holders are exposed to the risk that changes in the relevant price of the share may have an adverse effect on the amounts of interest, early redemption or final redemption, as well as on the value of the Share Linked Securities.
    - The Securities may provide for physical delivery. The value of such Securities may be affected and/or their settlement may be delayed if delivery of the Share Amount is impracticable because a Settlement Disruption Event has occurred and is continuing on the Delivery Date.
  - Risk factors relating to specific features :
    - Barrier : the payment of interest/redemption amount will be conditional on the value or performance of the Underlying Reference as determined in accordance with the Conditions applicable to the relevant Determination Date, being greater than or equal to a specified barrier value and if such condition is not satisfied then the amount of interest due will be zero and the redemption amount may be less than par. As a result, Holders may lose all or part of their investment.
